

Power Platform Architect

at Blenheim Chalcot India ([View all jobs](#))

Mumbai

Key Responsibilities:

1. **Architectural Leadership:**
 - Develop and communicate a clear architectural vision for Power Platform solutions aligned with business goals.
 - Provide leadership in designing scalable, secure, and maintainable Power Platform solutions.
2. **Solution Design:**
 - Collaborate with stakeholders to understand business requirements and translate them into Power Platform solutions.
 - Design end-to-end solutions incorporating Power Apps, Power Automate, Power BI, and Dataverse.
3. **Governance and Best Practices:**
 - Define and enforce governance policies and best practices for Power Platform development.
 - Conduct regular reviews to ensure compliance with architectural standards.
4. **Integration and Collaboration:**
 - Integrate Power Platform solutions with other enterprise systems, ensuring seamless data flow and process automation.
 - Collaborate with IT teams to align Power Platform architecture with overall enterprise architecture.
5. **Technical Leadership:**
 - Provide technical leadership and mentorship to Power Platform development teams.
 - Stay abreast of industry trends and emerging Power Platform features to drive innovation.
6. **Performance Optimization:**
 - Optimize Power Platform solutions for performance, scalability, and reliability.
 - Identify and address bottlenecks, ensuring efficient utilization of resources.
7. **Security and Compliance:**
 - Implement robust security measures for Power Platform solutions, safeguarding sensitive data.
 - Ensure compliance with industry regulations and organizational security standards.

Skills and Qualifications:

- Bachelor's degree in Computer Science, Information Technology, or a related field.
- Proven experience as a Power Platform Architect or in a similar role.
- In-depth knowledge of Microsoft Power Platform components, including Power Apps, Power Automate, Power BI, and Dataverse.
- Strong understanding of solution architecture, design patterns, and best practices.

- Experience with data modeling, custom connectors, and integration techniques within the Power Platform.
- Proficiency in defining and implementing security controls and compliance measures.
- Excellent communication and interpersonal skills.
- Ability to lead and collaborate with cross-functional teams.

Preferred Qualifications:

- Microsoft Certified: Power Platform Solution Architect Expert.
- Experience with Power Virtual Agents and AI Builder.
- Familiarity with Azure services related to the Power Platform.
- Knowledge of DevOps practices for Power Platform development.
- Proven success in driving digital transformation through the Power Platform.
